Re: Software Obsolescence Notice

Thomson Reuters continues to deliver robust, secure and high performance products for market data delivery at the lowest cost of ownership possible. We do so to provide you with the most value. As part of the standard product lifecycle, older versions of the Enterprise Platform product suite are removed from the marketplace in order to reallocate our resources to ensure we provide our clients with the highest performing products in the marketplace and a quality level of support.

In accordance with this, and under the terms of your relevant Thomson Reuters/Reuters contract, Thomson Reuters may withdraw software versions upon written notice to you. The purpose of this letter is to notify you of the withdrawal of various software versions and products.

Thomson Reuters hereby gives you notice under the terms of your relevant Thomson Reuters contract that each of the **products and software versions listed on the attached table will be End of Life**. Thomson Reuters will continue to support these products and versions during the notice period in accordance with the relevant contract terms, however **there will be no further support of these versions after the End of Life date listed**.

If you are currently operating with one of these software versions and/or products, we strongly recommend you discuss upgrades with your Account Team well in advance of the End of Life date.

For further information about the upgrade process or questions about the withdrawal of these versions and products, please contact your Thomson Reuters Technical Account Manager.

Yours faithfully,

.....
Mr. A J White

Open DACs Permission Server (ODPS)	Version 7.0.x	June 30, 2014	Version 7.2 – 7.5	Version 7.5.x or higher
Open DACs	Version 7.0.x	June 30, 2014	Version 7.2 – 7.5	Version 7.5.x or higher
Advanced Transformation System (ATS)	Version 1.2.x	June 30, 2014	Version 1.3 – 1.4	Version 1.4.x or higher
SSL Developers Kit C++ Edition (SFC)	Version 4.6.0 and 4.6.1	June 30, 2014	Version 4.6.2 – 4.6.3	Version 4.6.3 or higher

Compilers/Operating Systems going End-of-Life			
Name	EOL Version	End of Life Date	Recommended Migration Path
Visual Studio 2008 Support for Enterprise Platform	All Products	December 31, 2014	Visual Studio 2010 or higher

December 13, 2013

Re: Reminder – Products in Active Obsolescence and Obsolete Products

In addition to the above obsolescence notification, Thomson Reuters would like to remind you of the following products that are currently in active obsolescence and products that are now obsolete. These products have already been announced in previous obsolescence notifications; therefore the obsolescence notice issuance and End-of-Life dates are listed on the tables below. Once a product has reached its end-of-life date, it is no longer supported by Thomson Reuters.

If you are currently operating with one of these software versions and/or products, we strongly recommend you discuss upgrades with your Account Team.

Reminder: Products in Active Obsolescence				
Name	EOL Version	Recommended Migration Path	End-of-Life Date	Obsolescence Notice Issued
Reuters Management System (RMS)	All Versions	ITRS Geneos 3.0 or higher	December 31, 2013	December 31, 2011
News Distribution System (NDS)	All Versions	Advanced News System (ANS) 2.2 or higher	July 31, 2014	February 15, 2013

Reminder: Obsolete Products				
Name	EOL Version	Recommended Migration Path	End-of-Life Date	Obsolescence Notice Issued
Data Transformation System (DTS)	All Versions	Advanced Transformation System (ATS) 1.4 or higher	June 30, 2012	January 30, 2011
Reuters Market Data System (RMDS)	All Versions	Thomson Reuters Enterprise Platform (TREP) 2.5 or higher	Mar 31, 2013	May 31, 2011
Point to Point Server (P2PS)	All Versions	Advanced Distribution Server (ADS) 2.5 or higher	May 31, 2013	May 31, 2011
Market Data Hub (MDH)	All Versions	Advanced Data Hub (ADH) 2.5 or higher	May 31, 2013	May 31, 2011
SSL Classic Edition	All Versions	Ultra Performance API (UPA) C Edition 7.5 or higher	May 31, 2013	May 31, 2011
